Disaster Prevention

The presence of a tropical cyclone moving towards our shores is detected.

Stay tuned to weather information

1. Minimum hazard

Prune trees that obstruct electrical cables and others dangerous situations

Protect windows with adhesive tape in cross shape and secure objects that may be thrown away by the wind

Clean up the roofs, drains, channels and floor drains. Avoid littering

2. Low hazard

Identify the nearest temporary refuge and the route to get over quickly

Store food, drinking water and handy emergency supplies

Keep important documents in plastic bags

3. Moderate hazard

If your home is not safe, leave and get to a shelter

If you live near a river or pond, keep watch on the water level

Close doors and windows, shut off the gas and electricity supplies

4. High hazard

Stay away from windows to prevent injury if they break

Remain at home or shelter until authorities report that the hazard is over

Remain calm and keep yourself informed

5. Maximum hazard
